

As you know, insurance coverage for medications is always changing. It seems that medications, even generics, keep getting more expensive. We believe that patients should not have to spend a lot of money for medications to treat their pelvic floor problems.

We try to order generics when available. Unfortunately, we never know which medications will be covered by your insurance plan.

If you find your medications expensive or not covered please do the following:

1. Refuse to buy the medications when you go to pick up the prescription
2. Ask the pharmacist if there is a cheaper alternative
3. Call your insurance company to see which medication might be cheaper

The following are medication categories that might help you find a cheaper alternative.

Estrogen Replacement	Incontinence/Bladder Spasms
Estrace Cream	Detrol LA
Estradiol Cream	Enablex (Darifenacin)
Estring	Imipramine
Premarin Cream	Levsin
Vagifem (Yuvaferm)	Myrbetriq
	Oxybutynin IR or ER
	Sanctura XR
	Tolterodine
	Toviaz
	Trospium IR or ER
	Vesicare
